Title- Integrating networks

Internal energy market in the EU is one of the latest steps for the integration of the network in Europe. The European network of transmission system operators for gas played an important role in the creation of the new rules and environment for the creation of the internal gas market. In this presentation ENTSOG will show how in five years new rules, new tools and a better cooperation amongst all the players in the gas market took place.

Key words: third energy package, regulation 715/2009, TSOs, Agency for the Cooperation of Energy Regulators (ACER), cooperation, network codes, information availability to the market, vision for gas in the energy mix.
